CAREER OBJECTIVE

Motivated Computer Science student proficient in the Frontend. Experienced in creating responsive, user-friendly web applications. Strong team player with a passion for innovative solutions, seeking a Junior Web Developer role to apply and expand skills.

SKILLS:

Technical Skills:

Experts : React, React Router, Tailwind, Bootstrap, HTML, CSS .

Comfortable : Next.js , Redux Toolkit, Firebase Authentication, Next Auth .

Familiar : JavaScript, ES6, Node.js , Express.js

Tools : Git, VS Code, GitHub, Netlify, Vercel, Firebase.

Non-Technical Skills: Time Management, Team Collaboration, Communication

Projects:

❖Restaurant Website-[Website Link](#) || [Code Link](#)

A visually appealing and responsive restaurant website crafted with React. The design highlights a modern and elegant look, providing an engaging browsing experience on all devices. The website's layout and aesthetic choices reflect the restaurant's unique style, ensuring that users enjoy a sophisticated and user-friendly interface whether they're on a desktop, tablet, or mobile device.

❖E-Commerce Website-[Website Link](#) || [Code Link](#)

Designed and developed a React web application featuring dynamic routing for seamless navigation, alongside sorting and searching capabilities for enhanced data interaction. Implemented pagination to handle large datasets efficiently and integrated loading indicators to improve user experience during data fetch operations. The project emphasizes a responsive design and smooth functionality, ensuring an intuitive and engaging interface.
